## **University at a Glance**

Indira Gandhi Delhi Technical University for Women [IGDTUW], Delhi was established by Delhi Government in May 2013 vide Delhi State Legislature Act 9, 2012 in order to play a major role in the capacity building and imparting high quality technical education to women of our country. With the vision to make India a knowledge economy, the university provides quality education to women students in the areas of engineering, science, technology and management. With the aim to become one of the top technical universities in the country IGDTUW provides quality technical and management education with industry relevant curriculum and focus on experiential learning through internships, project work and industrial visits.

A University or any organization is known not by the Brick-and-Mortar structure but by the people that guide, mentor, constitute and contribute to the aura of that institute ably through leading by example. IGDTUW is known for its unique blend of teaching methodologies and industry-ready students. The robust programmes are meticulously tailored for today's reality, with an eye toward ever-changing market conditions and a focus on the 21st century skills expected of management professionals. IGDTUW continues to grow in order to remain important and meaningful for students and industry alike, thanks to its inherent ideals and community.

The University aims life beyond the classroom learning. To promote intellectual curiosity and excellence in management education the pedagogy is based on case studies, field-work and brain storming discussions along with the clear focus on principles and theory. The aim is to promote intellectual curiosity and open minds to new experiences. The idea is to provide thought leadership based on a thorough understanding of the market.

IGDTUW management students are gaining real-world experience through excellent industry interface programmes, allowing them to take on difficult assignments early in their careers. The curriculum is structured to prepare our students to make data-

driven, disciplined decisions based on a broad range of domain information. The programmes are created in response to a need to develop an outstanding cadre of leaders who will help make Indian industry globally competitive by providing them with an open and conducive environment for research and education, as well as an integrated system of mentoring and teaching by nationally and internationally renowned faculty, practitioners, and industry leaders.

Students are instilled with a spirit of inquiry by the IGDTUW community, which encourages them to pursue personal and intellectual development throughout their lives. This community encourages new ways of thinking and the quest for new tools to change the way things are done. Students hence develop competent skills, experience, and expertise in order to prepare for leadership in a diverse and complex environment.

The university has state of art infrastructure to develop confident and spirited next generation of future ready women, who would excel in all realms of their personal and professional life. ## Award for M Tech student, first from India

SATYENDRA MANI @New Delhi

MONIKA Kumar, a second-year M.Tech student of Indira Gandhi Technical University for Women (IGTUW), became the first woman in India to get the Financial Services Information Sharing Analysis Center (FS-ISAC) Cyber Security scholarship worth USD 10,000.

The scholarship was launched by FS-ISAC, an industry consortium dedicated to reducing cyber-risk in the global financial system, back in 2005 to support financially and mentor young women in the field of cyber security.

Every year FS-ISAC selects 16 women throughout the world and mentors them to reach great heights in their career. Monika is the first from the city to bag this illustrious scholarship for building social security enthusiasts.

Sharing her experience, the 25-year-old student of Information Security Management said, "I am very happy and overwhelmed by this development. It is personally a great experience for me as FS-ISAC is a recognised platform on the global stage. Apart from the scholarship, I also got a chance to go abroad and work under great mentors

excelling in the field of cyber security."

While the Financial Services Information Sharing Analysis Center is based out of the United States of America, it has offices in the United Kingdom and Singapore as well.

"By bagging the scholarship, Monika has not only made our university proud but has also brought laurels to the entire nation as this particular scholarship is of global relevance," said professor Amit Dev, vice-chancellor of IGDTUW.

"It is a matter of great pride for the entire university to see our students making a mark at not only the national level but international level as well," she further added.
