DCS and microprocessor Lab ECE Department is equipped with following kits and Cards

With approximate number of quantities mentioned against their names in bracket

- **Digital I.C. tester (03),**
- **General purpose kits and Basic Logic Gates (73)**
- **Embedded system kits(10)**
- **Interface cards with Embedded system kits (10)**
- **ADC kits (07)**
- **DAC Kits (07)**
- **8085 microprocessor kits (15)**
- **8086 microprocessor kits (10)**
- **8051 microcontroller kits(05)**
- **Interface cards (each 'one' in number)with 8086 are -8255, 8251, 8253, Temperature controller card, DC motor card, Hex Pad card, ADC card, DAC card.**
- **Interface cards (each 'one' in number)with 8051 microcontroller kit are: 8255, LED, 12 bit ADC, stepper motor, DC motor.**
- **Interface cards with 8085 are : 8255(02), 8251(01), 8259(02), 8253(01), 8279(02), Interface card-buffer/latch/decodes/memory(06), Stepper motor control car(02), DC motor control card(02), Traffic controller card (02), 8155 interface card(02), ADC (02), dual DAC card(02)**
